Please participate an activities

- Can you look at your right palm and bring very close to your eyes?
- Now, can you move your palm away as much as you can?
- Last one, can you look at the right palm of the person in the 4th row in the front?
- So what is the dilemma of the three scenarios?

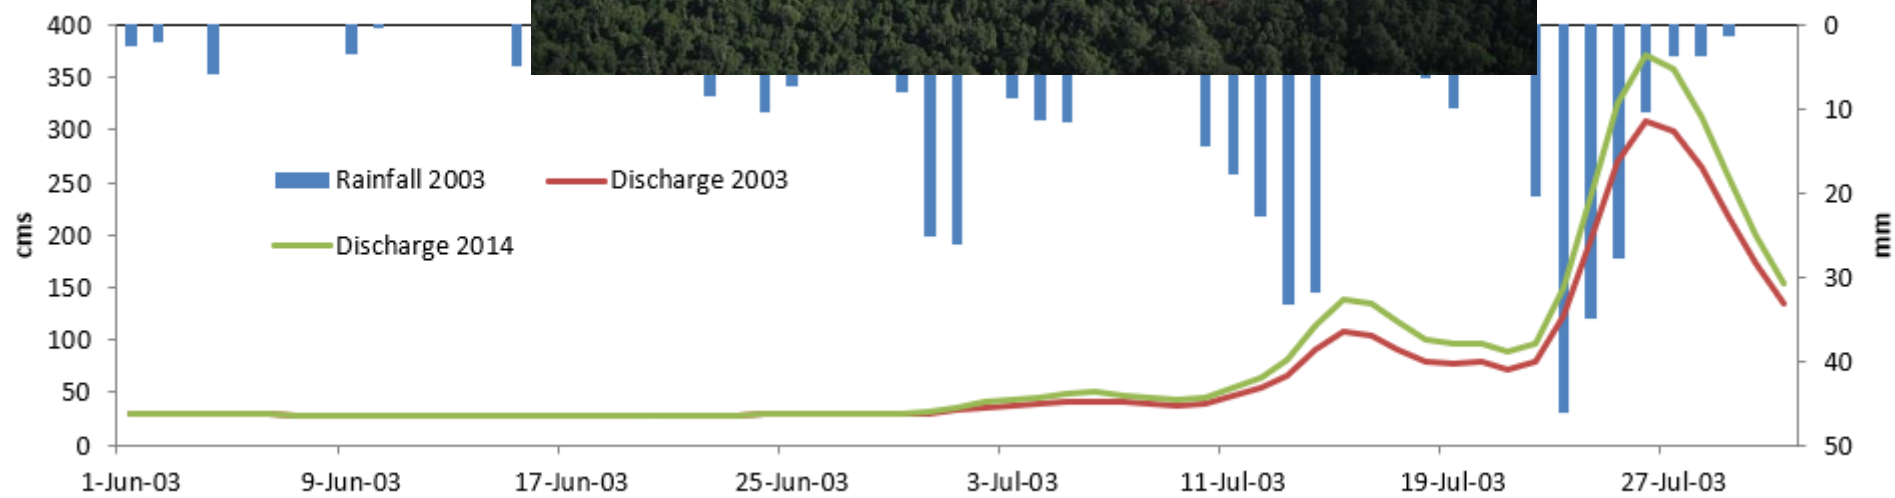

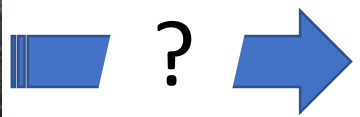

Mekong River Profile from Headwaters to Mouth

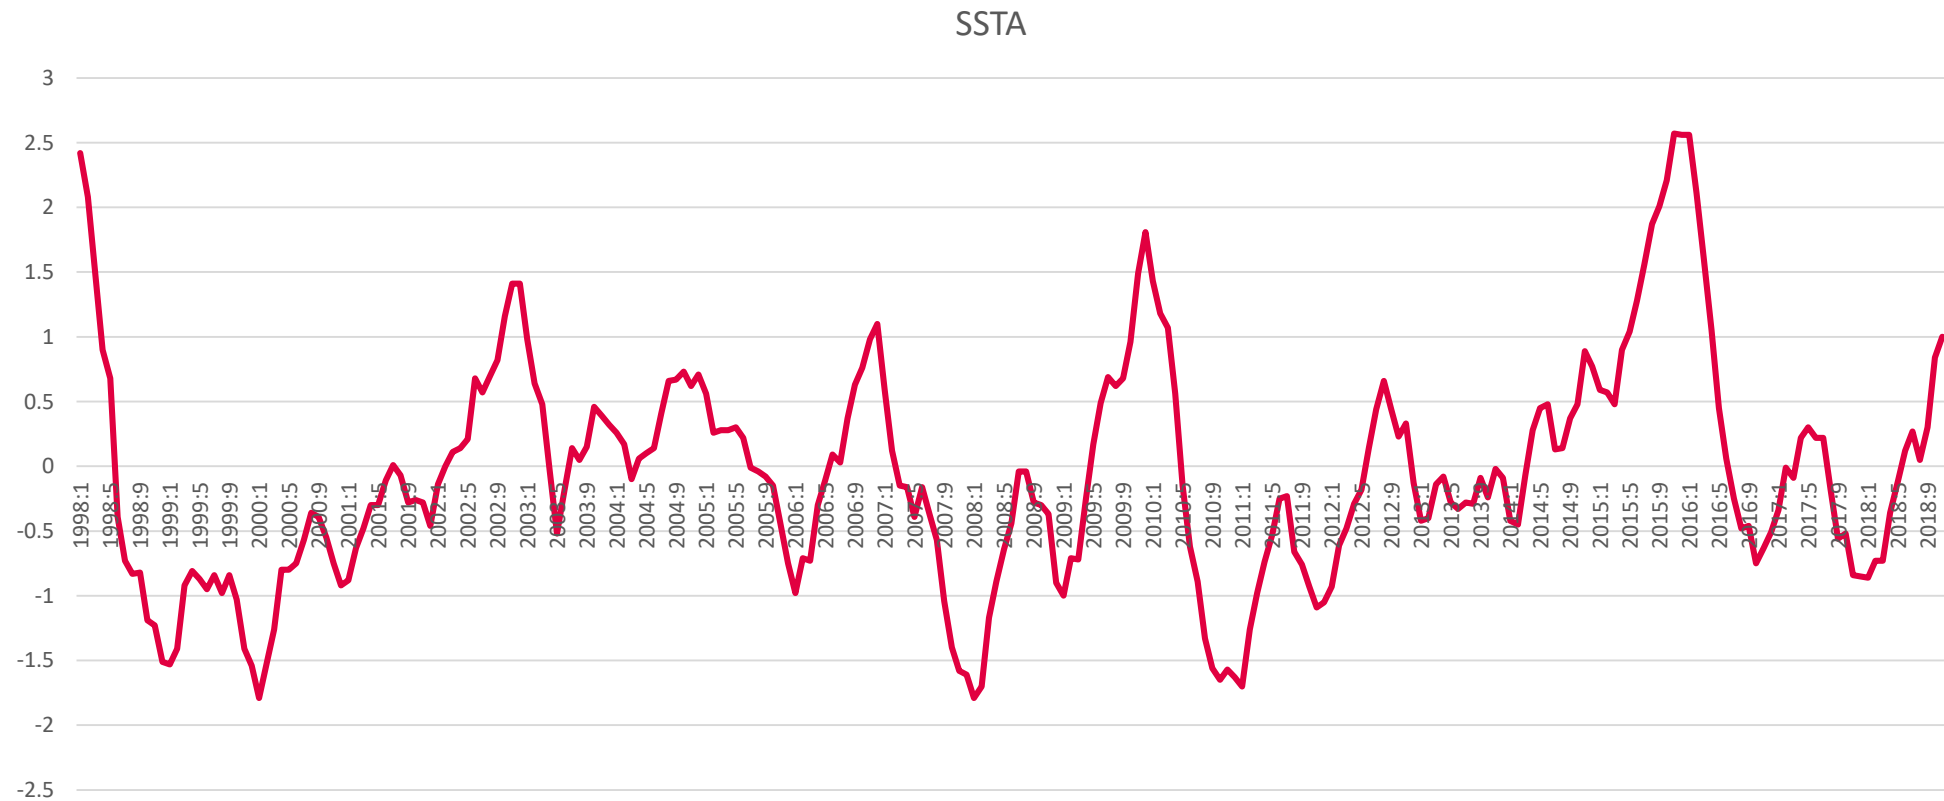

Mainstream dams on the Mekong

Potential hydrological impact by ENSO phenomenon (SSTA) and Climate Change

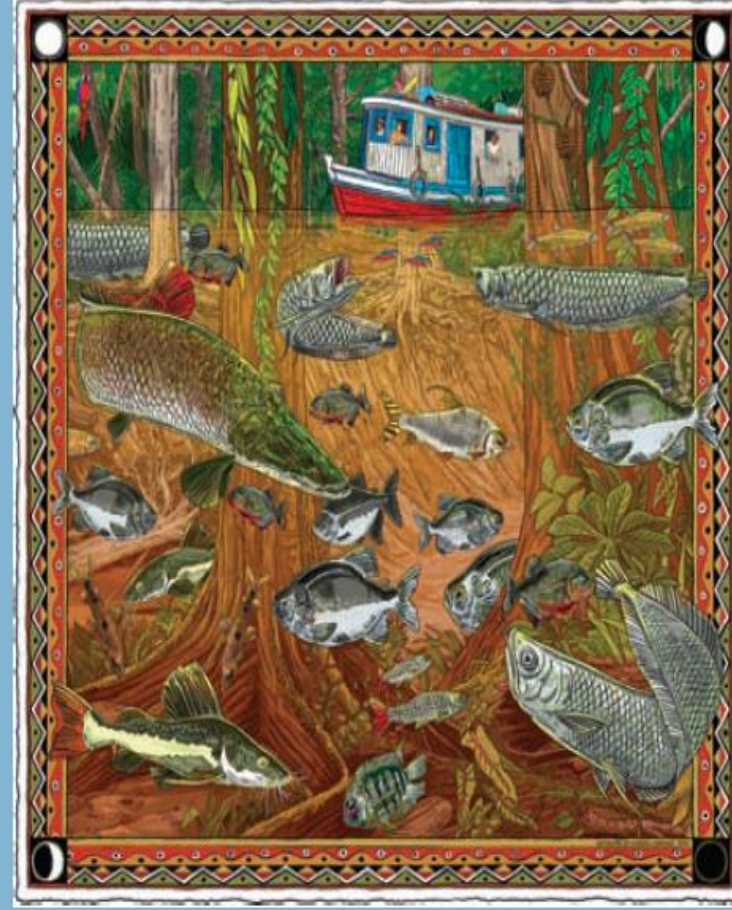

Dry Season: The forest floor is teeming with all sorts of mammals, birds, bugs, and other creatures.

Image by Karen Lybrand

Rainy Season: Many land animals migrate up the tree trunks and fish invade the flooded forest.
